Hi Jan,

Here's the project status update we sent to Steve earlier this week.

Let me know if you have any questions.

Thanks,

Jim

Hi, Dave and all.

Steve asked that you send us the information about your testing as soon as it's available, particularly any testing related to treatment/flocculant/polymer.

Thanks.

Jan

Steve:

On Friday, Jim Jonas was nearly complete with the preliminary flocculant work and summarization of other items that we discussed. We will get you the summary very soon. I'm glad that the treatment activities at Gladstone are going well. Following the submittal, we will hold on any further activity until we hear from you.

Thanks,

Dave

Subject: Re: Gold King Mine - temporary treatment system support

Hello Dave and Dave,

In light of the newly installed treatment system and operations underway at Gladstone, the need is reduced to continue with any additional support for the "temporary" water treatment system. Please provide me this week with an update on any findings / testing regarding the flocculent products and potential lime addition system set that have been developed since we last communicated. After providing that information, I request that any additional work be postponed pending our discussing that need.

If you have questions, please let me know. Thank you for your assistance on this effort.

Sincerely,

Steve
